Sizes,	2 qt.	3 qt.	4 qt.	6 qt.	8 qt.	10 qt.	14 qt.
Prices,	\$3.75	4.50	5.50	7.00	9.00	11.00	14.00

SOME REASONS WHY  
WE CLAIM

*The Gem Freezer*  
*The Best in the World.*

The Pail of the "Gem" Freezer is made of Best Quality White Cedar.

Will not shrink, is tougher and stronger than white pine, of which the pails of nearly all other freezers are made.

The Gearing of the "Gem" is Completely Covered.

No ice or salt can get between the cogs and choke or break them, nor can the hand or fingers become injured by being caught in the gearing. In other freezers the gearing is exposed, and accidents as those pointed out are liable to happen thereby.

The "Gem" Freezer is Double Action.

The can moves in one direction while the stirrer is moved in opposite direction, beating up the mixture in the can. No freezer now made has more than two motions, and although some manufacturers claim to have more, it can be easily shown that such is not the case.

The "Gem" has a Self-Adjusting Wooden Scraper

attached to the stirrer which, as it turns, scrapes all the frozen particles from the side of the can as quickly as formed, allowing the unfrozen liquid to come to the side.

The Stirrer in the "Gem" can be taken out of the Can and the latter still be Revolved.

An important feature in preparing frozen fruits, etc., and not found in most freezers.

The Iron Work of the "Gem" is Thickly and Smoothly Galvanized.

The Cans of the "Gem" are all made of Heavy Tin,

and with the stirrer in are guaranteed to hold the full measure of quarts indicated by their size number.

The Ice Space of the "Gem"

has been arranged to use the smallest possible amount of ice - an important consideration in some parts of the country where ice is expensive. With this ice space the finest ice cream has been frozen repeatedly in public in 8 minutes in 4 quart size and 10½ minutes in 8 quart size.

The various parts of the "Gem" Freezer are much more simple to put together than in any other freezer and require but one catch to lock everything together ready for use.

The Weight of the "Gem"

is less than of the corresponding sizes of other freezers; hence a convenience in use, and costs less for freight.

Wrapping: The "Gem" Freezer is entirely Wrapped in Heavy Paper

and attractively labelled. The wrapper leaves no part of the freezer exposed, enabling them to be kept perfectly clean in transportation and in store. Recipe Book is packed in each freezer. This book, *Dainty Dishes for All the Year Round*, contains one hundred and twenty recipes for all kinds of ice creams, sherbets, water ices, frozen desserts, etc., written by Mrs. S. T. Rorer, Principal of Philadelphia Cooking School and Editor of *Table Talk*. Nothing to compare with this is furnished with other freezers.

In short, the "Gem" Freezer is the simplest, neatest, most convenient and satisfactory for family use, and the cheapest of all Ice Cream Freezers of established reputation. Its constantly increasing sale attests this and calls for your careful consideration if you want the BEST Freezer made. Be sure you get no other than the "Gem." Each freezer is now labelled in red, both on the tub and on the wrapper, thus:—

*The Gem Freezer*  
*The Best in the World.*

## The Chief Merits We Claim for all Our Make of Freezers.

A strong pail, made of best quality cedar, bound with galvanized iron hoops. Complete covering of all gearing, so that nothing can get between the cogs. The can may be revolved to harden contents after the stirrer has been removed; very necessary in the preparation of fruit ices and frozen fruits. The cross-bar so arranged in its place as to give greatest facility for packing the ice and salt. A self-adjusting scraper. All workmanship and material of the best quality. Each Freezer is wrapped up in heavy paper, to protect it from dirt and dust, with an attractive colored label on outside of package.

**The "American"—Single Action.**

Has all the advantages of higher priced freezers, except that crank is on top instead of on the side. It is the only low priced freezer of established reputation in the market.

Sizes,	1 qt.	2 qt.	3 qt.	4 qt.	6 qt.
Prices,	\$2.35	2.75	3.25	3.75	5.00

**The "Blizzard"—Single Action.**

Is the same as our "Gem" freezer except that it is single action. It has the same small ice space, and every other advantage.

Sizes,	2 qt.	3 qt.	4 qt.	6 qt.	8 qt.	10 qt.	14 qt.
Prices,	\$3.75	4.50	5.50	7.00	9.00	11.00	14.00

**The "Star"—Double Action.**

Constructed on the same principal as the "Gem," but is heavier and stronger. It differs from the "Crown" only in being double acting—that is, the can and stirrer both revolving in opposite directions.

Sizes,	1 qt.	2 qt.	3 qt.	4 qt.	6 qt.	8 qt.	10 qt.	14 qt.
Prices,	\$3.00	3.75	4.50	5.50	7.00	9.00	11.00	14.00

**The "Crown"—Single Action.**

Our original style Freezer. Heavy and strong, with larger ice space than our "Gem," and therefore a little higher in price.

Sizes,	1 qt.	2 qt.	3 qt.	4 qt.	6 qt.	8 qt.	10 qt.	14 qt.
Prices,	\$3.00	3.75	4.50	5.50	7.00	9.00	11.00	14.00

## THE CROWN ICE CREAM FREEZER, DOUBLE ACTION.

Specially adapted to the needs of Boarding Houses, Hotels, Confectioners, Etc., Etc.

Is recommended with confidence as equal to the best Freezers in the market, with some meritorious advantages not found in others. Prominent among which we mention:

The Tub is made strong and heavy and of best quality Cedar, bound with Galvanized Iron Hoops.

The Cross-bar is arranged to swing up on one side of Tub to remove Can, while the fly-wheel remains stationary on opposite side of Tub, and does not require to be lifted with Bar, as in other makes of Freezers.

The Gear Shaft and Fly-wheel Shaft are connected by means of a Clutch, which engages and disengages by simply raising or lowering the Cross-bar.

The Can can be revolved to harden Cream after Stirrer has been removed.

The Cross-bar is arranged to give the greatest facility for packing ice.

The Can and Stirrer both revolve, but in opposite directions.

The Scraper is Self-adjusting.

The Workmanship and Material are of the very best.

Sizes,	8-qt.	10-qt.	14-qt.	18-qt.	24-qt.	32-qt.
With Crank,	\$10.50	\$13.00	\$16.50	\$21.00	\$25.00	—
With Fly-wheel,	13.00	16.00	20.00	25.00	30.00	37.50

Each Freezer is wrapped up in heavy paper to protect it from dirt and dust, and an attractive label in colors put on outside of package.

### The "Gem" Ice Shave

is a simple and handy tool for shaving and collecting ice from blocks without removing the latter from the refrigerator or ice chest, and is the only tool of the kind in the market.

As shown in cut, it is constructed like an ordinary plane, made of galvanized cast iron, with a knife adjustable to shaving fine or coarse. In front of the knife is a receptacle about the size of a tumbler, closed by a lid, in which the shaved ice collects when the tool is pushed forward and backward on a block of ice. When filled, the lid is raised and contents emptied, which will be found as fine as snow. The tool is quite short and of convenient size to fit the hand, and can be used on any size piece of ice as it lays in a refrigerator. Shaved ice is desirable for a great variety of purposes, such as

For use in sick rooms—dissolving quickly in the mouth.  
 Making ice poultices—being fine it perfectly fits the parts to which applied.  
 For cooling oysters on half shell.  
 For cooling water, wines or other liquids.  
 For making lemonade or iced drinks of any kind.  
 For use at soda fountains.

Anyone who has tried to get a small quantity of fine ice by using an ordinary ice pick and without taking the block of ice out of the ice chest can readily appreciate the usefulness of the Gem Ice Shave.  
 Saves time, labor, refrigerator, ice and patience.

Price, . . . . . per dozen, \$6.00  
 Packed in one and three dozen cases.

### The "Crown" Ice Chipper.

It is a simple, effective and cheap tool for chipping ice. It is a well known fact that in making ice cream or water ice the ice must be mixed with salt in order to produce a freezing action, and the smaller and more uniform the pieces are, the quicker the freezing goes on, and the less ice is consumed in the process.

By the use of the "CROWN" ICE CHIPPER, the ice is chipped into small and nearly uniform pieces, the guard projecting beyond the serrated cutting edge of the knife, making it impossible to cut off thicker pieces than the space between them. Only a few minutes time is required to reduce a 15 to 20 pound block of ice into small pieces.

The tool is also highly recommended for use at bars, soda fountains, etc., or wherever fine ice is desirable for cooling purposes.

Price, . . . . . per dozen, \$6.00  
 Packed one doz. and three doz. in a case.

### The "Star" Ice Chipper.

is similar to the Crown but is lighter, and the blade is not as wide, consequently not quite as effective. The guard is thin and sharp on the end, so that it can also be used for splitting large blocks of ice into smaller lumps for use in water coolers.

### The "Gem" Freezer Clamp.

A simple, handy and cheap attachment for holding the freezer firm during the time of operating. Does not interfere with the work. The two screw-eyes are screwed into the bench, box or wherever the freezer is usually placed (one on each side of the freezer), and the wire rods hooked into them. The clamps are then hooked over the edge of the tub, as shown in cut, and by screwing down the thumb-nuts the clamps are drawn tight and the freezer held firmly in place.

Those who prefer to stand the freezer in the kitchen sink or in a dishpan while using it can have an inch board cut to fit across the sink or in the bottom of the pan and clamp the freezer to it.

The use of these clamps takes away the greater part of the labor in making ice cream. They are made of wire and malleable iron and tinned all over to prevent rusting.

Sizes.	Hold "Gem" Freezers.	Hold other Freezer with tub of height	Price, all sizes.
No. 1.	2 and 3 quart,	9 $\frac{3}{4}$ inch to 11 $\frac{1}{4}$ inch,	} per doz. pairs, \$3.00
" 2.	4 " 6 "	11 $\frac{1}{4}$ " 13 $\frac{3}{4}$ "	
" 3.	8 " 10 "	13 $\frac{3}{4}$ " 17 $\frac{1}{2}$ "	
" 4.	14 "	17 $\frac{1}{2}$ " 19 "	

Packed as desired.

## THE PERFECTION MEAT CUTTER,

The Latest, Best and Most Improved for Family Use,

Is offered to the Trade as the result of several years' careful study and experimenting as to what is required for a perfect and satisfactory cutter for family use. It is strong, simple, easily put together and taken apart, of few pieces, easily operated and cleaned, no parts to wear out or become dull, cuts and does not grind the meat, etc., and is offered with the fullest confidence as to its superior advantages over other cutters now in the market.

The Perfection Meat Cutter is designed pre-eminently as a machine for family use, and in this respect fills a demand which is not met by other meat cutters now in the market.

For family use it is not only necessary to cut raw meats, but cooked meats, chicken, lobsters, oysters, etc., for croquettes; suet; codfish; material for mince pies and fruit cakes; almonds and cocoanuts for cakes; pulverizing stale bread and crackers for frying purposes; chopping vegetables for soup; beef for beef tea, and many other purposes. Not only will the Perfection Cutter do this thoroughly, but it will cut equally well raw beef and pork for sausages; liver, etc., either hot or cold for puddings; scrapple, hogshead cheese, and be used for many other purposes required by butchers and farmers.

For the benefit of families each machine is furnished with a recipe book, "Dainty Dishes for All the Year Round," written by Mrs. Rorer, Principal of the Philadelphia Cooking School, giving full and explicit directions for preparing sixty dishes, both plain and fancy, in the preparation of which the Perfection Cutter can be used to great advantage in saving of time and convenience. By its use all cold pieces of meats, etc., left over from one meal, and generally wasted, can be used with but little trouble in preparing many of the palatable dishes found at leading hotels and restaurants.

No Loose Knives  
to get dull or out  
of order.

**CUTS**  
Instead of Mashes.

**REQUIRES**  
**NO REPAIRS.**

The parts of cutter are shown in illustration. After putting the cutting screw in frame, pull the cone up tight on cutting screw, the grooves in cone engaging with the pins in the frame. Hold firmly in place by pulling with the first finger of left hand under pin on left side of cone, and the thumb on top of hopper, and with the other hand push the catch down tight over pin on right hand side of cone, and tighten screw while holding parts firmly in place with left hand—this locks all working parts together ready for use. The cone should be on tight enough that crank will remain stationary in any position. The machine is held in place either temporarily by two clamps furnished with each machine, or permanently by screws, for which holes are drilled in the base, the one machine answering for both purposes. The meat, etc., to be cut is dropped in hopper in either large or small pieces as desired, and only require to be of such size as will go in the hopper easily. The pieces are forced forward by the screw to the cone, where they are cut between the sharp edges of the revolving screw and those of the stationary oblique knives in the cone—like between the blades of a pair of scissors—and finally reduced to a uniform size by a further cutting in passing through the holes in the cone. The work of cutting is thus advantageously divided and all unnecessary friction and waste of power avoided.

### Sausage Stuffing Attachment.

To be attached to the machine in place of the cone. The meat is first cut in the regular way, then seasoned and mixed and fed into the machine with stuffer attached and forced tightly into the skins.

The No. 1 Machine cannot be furnished with cones having larger holes than 1/4 inch.

The size regularly furnished in all machines is 5/32 in.

## PRICES.

No. 1, Cuts 1 lb per minute,	each, \$2 00
" 2, " 2 " "	" 2 75
" 3, " 3 " "	" 4.00

The size of holes in cones furnished regularly with cutters is 5/32 inch

Cutters ordered with finer holes in cone than 5/32 inch will be charged at an advance equal to difference in price of cones with 5/32 inch holes and those with finer holes as given in Price List of Parts.

Packed one-half dozen in case.

## The Crown Fluting Machine.

Has all the valuable features of the best machines in the market, and in addition has several important novelties, to which we beg to call attention.

The spring is so placed that the separating of the rolls for the putting in the work does not compress or effect it in the least, thus not only saving the spring unnecessary strain, but easing the operation. The lower roll projects over the base plate free of all obstruction, thereby giving the machine a greater latitude for different kinds of work, which a post supporting the end of the roll would interfere with.

The machines are finished in a superior manner, with swivel clamp attachment to fasten them either to the side or end of a table. Each machine is put in a separate wooden box with four heaters and a pair of tongs.

Sizes (length of rolls),  $4\frac{1}{2}$  6 8 inch.  
 Price, . . . \$3.50 \$4.00 \$6.50 each.  
 Extra rolls, . . . 1.90 2.20 3.50 per pair.  
 Crated in packages of four.

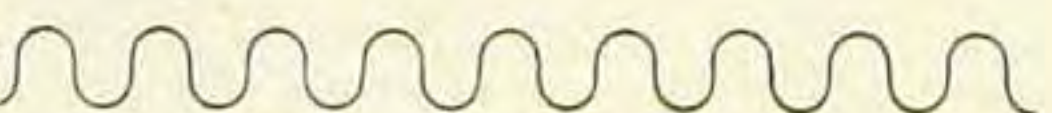

Sizes (length of rolls),  $4\frac{1}{2}$ , 6 and 8 inches.  
 The rolls are made in following styles, viz.:

**No. 10** 

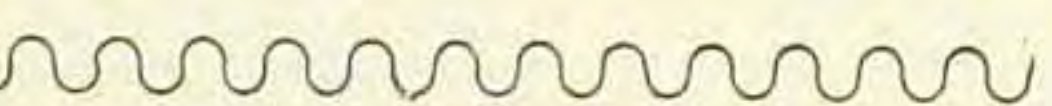

**No. 12** 

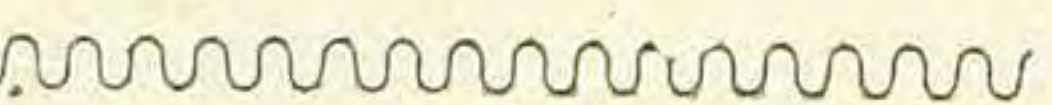

**No. 15** 

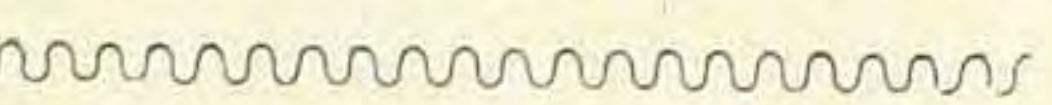

**No. 18** 

**No. 22** 

**No. 26** 

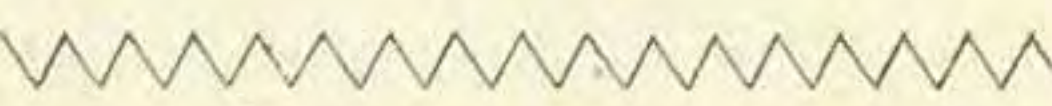

**No. 30** 

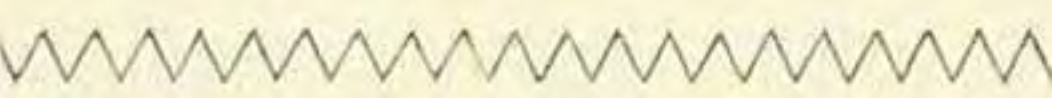

**No. 40** 

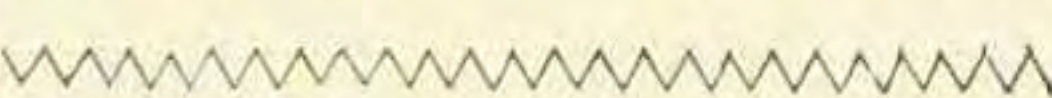

**No. 50** 

**No. 126** 

**No. 130** 

**No. 140** 

**No. 150** 

**No. 160** 

## Original "Knox" Fluting Machine.

This old favorite machine needs no recommendation. It is made and finished in the same superior style as our other machines, with swivel clamp attachment to fasten it either to the side or end of a table.

Each machine is put in a separate wooden box with four heaters and a pair of tongs.

Sizes (length of rolls),  $4\frac{1}{2}$ , 6 and 8 inches. The rolls are made in all styles, as shown in above diagram.

Sizes (length of rolls),  $4\frac{1}{2}$  6 8 inch.  
 Price, . . . \$3.25 \$3.60 \$6.00 each.  
 Extra rolls, . . . 1.90 2.20 3.50 per pair.  
 Crated in packages of four.

## The American Fluting Machine

Has all the valuable features of the best machines in the market, and in addition has several important practical features not found in any other style of machine. The platform in front of lower roll is arranged to enable the operator to guide the material, and by a pressure of a hand on it to separate the rolls quickly and without trouble, in order to adjust the goods if fluted crooked or bias, or if goods are being scorched from using heaters that are too hot.

The spring is so placed that the separating of the rolls for the putting in the work does not compress or effect it in the least, thus not only saving the spring unnecessary strain, but easing the operation.

Each machine is put in a separate wooden box, with four heaters and a lifter.

Sizes (length of rolls) 5, 6 and 7 inches. The rolls are made in following styles, viz.:

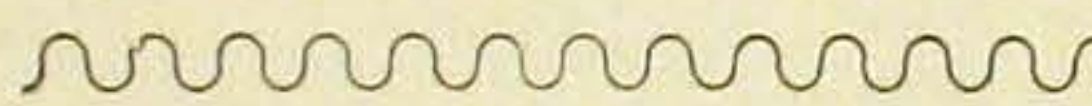

**No. 12** 

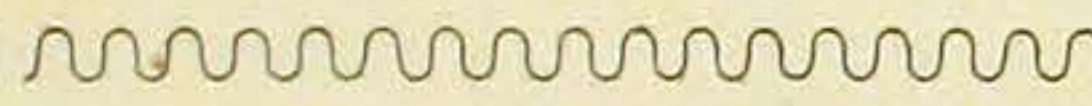

**No. 15** 

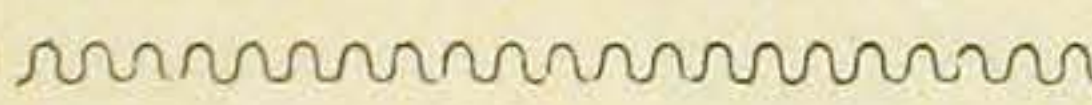

**No. 18** 

**No. 22** 

**No. 26** 

**No. 30** 

**No. 40** 

**No. 50** 

**No. 126** 

**No. 130** 

**No. 140** 

**No. 150** 

**No. 160** 

## The Eagle Fluting Machine

Is designed to meet the popular demand for a fluter that combines all the practical advantages of a machine having corrugated rolls, with the cheapness of a hand fluter, and in offering the Eagle Fluting Machine to the trade we feel convinced that we have fully succeeded in meeting this want.

The machine has smaller rolls and is lighter than the "Crown" or "American" (hence its lower price), but it will turn out quite as good work, and for moderate use do equally as good service. Each machine is enclosed in a paper box and supplied with a clamp, four wrought iron heaters and a lifter.

Sizes (length of rolls)  $3\frac{1}{2}$  and  $5\frac{1}{2}$  inches furnished with rolls of 15, 18 or 22 flutes (see diagram above).

Sizes (length of rolls),	5	6	7 inches.
Price,	\$3.00	3.40	4.50 each.
Extra rolls,	1.65	1.90	2.50 per pair.

Crated in packages of four or six.

Sizes (length of rolls),	$3\frac{1}{2}$	$5\frac{1}{2}$ inches.
Price,	\$2.15	2.85 each.
Extra rolls,	1.15	1.55 per pair.

Packed one-half dozen in a case.

## CROWN HAND FLUTERS.

No. 1.

The No. 1 Hand Flutter has a plate 7 inches long and  $3\frac{1}{4}$  inches wide, and a roll  $2\frac{3}{8}$  inches diameter. Both roll and plate are finely polished and nickel plated. The plate is furnished with stops at each end to prevent roll running off and tearing goods. The plate is hinged to base and does not require to be lifted off and laid aside to remove heating iron. The heating irons are laid in a recess of the base under plate. Two irons are furnished with each Flutter and a lifter to handle them. The handle is of wood, and yoke holding roll of malleable iron. All parts not nickel plated are neatly japanned.

The No. 2 Hand Flutter is the same as our No. 1, except that the roll is smaller, being  $1\frac{3}{8}$  inches diameter. The wood handle is placed at right angles to the length of the Roll. Each Flutter is packed in a strong paper box.

No. 1, Packed one-half dozen in a case,	per dozen, \$15.00
" 2, " one dozen "	" 12.50

No. 3.

The No. 3 Hand Flutter has a Plate  $5\frac{1}{2}$  inches long and 3 inches wide, and a roll  $1\frac{3}{8}$  inches diameter. Both roll and plate are finely polished and nickel plated. The plate is furnished with stops at each end to prevent roll running off and tearing goods. The plate is hinged to base and does not require to be lifted off and laid aside to remove heating iron. The heating irons are laid in a recess of the base under plate. Two heating irons are furnished with each Flutter. The handle and yoke to hold roll is made in one piece of malleable iron. This handle, by means of the projection seen in cut over roll, also serves as a lifter to handle the heating irons. All parts not nickel plated are neatly japanned.

The No. 4 Hand Flutter is the same as our No. 3, except in the following particulars: The plate instead of being hinged to base simply rests on it. The heating iron, instead of being separate, is cast on to the bottom of the plate. In order to heat the Plate it is lifted off the base and placed on stove, and when hot put back on the base. Both plate and roll are finely polished, but not nickel plated. All parts not polished are neatly japanned. Each Flutter is packed in a strong paper box.

No. 3, Packed one dozen in a case,	per dozen, \$10.50
" 4, " " " "	" 8.25

### The "A. M. Co." Clothes Wringer.

This Wringer is in every respect the most practical one made. When fastened tightly on the tub, as shown in cut, it is ready for use. The horse-shoe shaped steel springs supply automatically the necessary pressure to wring clothes of varying thickness, the clothes only needing spreading out as they pass between the rolls to ensure being wrung dry with little exertion. The rolls are of white rubber with makers' name stamped on as a guarantee of best quality. It is made with either japanned or galvanized springs.

No. 2.	Rolls 10 inches long, $1\frac{3}{4}$ inches diameter,		per dozen, \$36.00

Packed one-half dozen in a case.

### The Crown Christmas Tree Holder.

Is offered to the public as a decided improvement upon any other style in the market. The usefulness of this article is obvious to any one who has tried to arrange blocks, boxes, or other appliances for holding Christmas trees.

The Holder is made of two sizes, to hold 2-inch or 3-inch trees or less, and is so constructed that it will firmly clamp and hold any size tree that may be put in it. The legs are placed in the sockets and fastened by the small thumb screws; the ring nut is turned downward, whereby the clamps are thrown outward. The tree is then set in the Holder and the ring nut turned upwards until the clamps have a sufficiently tight hold. If desirable, the Holder can be fastened to the floor, etc., by means of small tacks or screws. Should the tree shrink and become loose in the Holder, a slight turn upwards of the ring nut will tighten it again.

Mrs. Potts' Patent "Crown" Cold Handle, Double Pointed Smoothing and Polishing Irons.

The great merits of these irons are already so universally known that it seems needless to refer to them here; a few main points, however, may not be amiss. They are better made and finer finished and hold the heat longer than any iron heretofore produced. They are double pointed, and will iron either way. The handle being of walnut wood, detachable by a spring, never becomes hot, requires therefore no holder or cloth, and being of a circular shape, fits the hand naturally, without straining the wrist or arm. Three irons, one handle and stand constitute a set, as represented by above cut. There are three sizes in each set. No. 1 weighs about four pounds, has one round end for polishing or glossing, and is very suitable for light work; No. 2 weighs about five pounds, and is for general use; No. 3 weighs about six pounds, and is suitable for table-cloths, sheets, etc.

# Mrs. Potts' Patent "Crown" Cold, Handle, Square Back Smoothing and Polishing Irons

Are similar in all respects to our celebrated Mrs. Potts' double pointed irons, except that they have but one point, the other end of iron being square, with the edge rounded off for polishing. The handle being of walnut wood, detachable by a spring, never becomes hot, requires therefore no holder or cloth, and being of a circular shape, fits the hand naturally, without straining the wrist or arm. Three irons, one handle and stand constitute a set, as represented by above cut. There are three sizes in each set. No. 1 weighs about four pounds, and is very suitable for light work; No. 2 weighs about five pounds, and is for general use; No. 3 weighs about six pounds, and is suitable for table-cloths, sheets, etc.

### Star Double Pointed Smoothing and Polishing Irons.

This is the same as our Nos. 150 and 155 irons, but without the detachable wooden handle, a perforated fixed iron handle being substituted instead. Although this iron does not possess the many advantages of the detachable wooden handle, it is decidedly superior in every way to the ordinary solid irons, as it has all the other features of Nos. 150 and 155.

There are three sizes of these irons. No. 1 weighs about four pounds, has one round end for polishing or glossing, and is very suitable for light work; No. 2 weighs about five pounds, and is for general use; No. 3 weighs about six pounds, and is suitable for table-cloths, sheets, etc.

No. 70, Nickel plated, Nos. 1, 2 or 3,	per dozen, \$9.00
" 75, Plain polished, " "	" 6.75

Packed one or two dozen in a case.

### Star Square Back Smoothing and Polishing Irons.

This is the same as our Nos. 160 and 165 irons, but without the detachable wooden handle, a perforated fixed iron handle being substituted instead. Although this iron does not possess the many advantages of the detachable wooden handle, it is decidedly superior in every way to the ordinary solid irons, as it has all the other advantages of Nos. 160 and 165.

There are three sizes of these irons. No. 1 weighs about four pounds, and is very suitable for light work; No. 2 weighs about five pounds, and is for general work; No. 3 weighs about six pounds, and is suitable for table-cloths, sheets, etc.

" 76, Plain polished, " "	" 6.75

Packed one or two dozen to a case.

## Mrs. Potts' Patent "Crown" Cold Handle, Double Pointed, Smoothing and Polishing Irons.

CHINESE POLISHER.

The above iron has all round edges, and is adapted for laundry and general polishing purposes. It is made in two sizes, and is the handsomest and best polishing iron ever offered for sale. It has the detachable walnut handle, which never becomes hot, and possesses all the other advantages of our Mrs. Potts' Patent Irons.

No. 180, Nickel plated, weighs about $4\frac{1}{2}$ lbs.,	per doz.,	\$15 00
" 185, Plain polished, " $4\frac{1}{2}$ "	"	13.00
" 182, Nickel plated, " 3 "	"	11.00
" 187, Plain polished, " 3 "	"	9.00

Packed one or two dozen in a case.

GIRLS' POLISHING IRONS.

These irons weigh about two pounds each, and have one end of iron rounded for polishing. The handle is made of walnut, and is detachable and never becomes hot.

A stand is furnished with each iron.

These irons are intended for polishing and ironing small articles, silk hats, etc., and make a very fine toy.

No. 190, Nickel plated, with handles,	per doz.,	\$7.50
" 195, Plain polished " "	"	6.00

Packed two or three dozen in a case.

## Mrs. Potts' Patent "Star," Double Pointed, Smoothing and Polishing Irons.

STAR POLISHER.

The above iron has all round edges like our Chinese Polisher, but without the detachable wooden handle, a perforated fixed iron handle being substituted instead.

It is adapted for laundry and general polishing purposes.

No. 72, Nickel plated, weighs about 3 lbs.,	per doz.,	\$9 00
" 77, Plain polished, " 3 "	"	6.75

Packed one or two dozen in a case.

GIRLS' STAR TOY IRON.

### The American Tobacco Cutter.

Is a simple and efficient machine. It has a knife  $4\frac{1}{2}$  inches wide, and will cut any thickness, from  $1\frac{1}{4}$  inches down, with ease, leaving a clean edge.

Price,

per dozen, \$15.00

Packed one in a wooden box, crated in packages as desired.

### The American Tobacco Shave.

For making fine cut from plug. Can be changed to cut finer or coarser by loosening the screws and moving the knife in or out, and moving the wooden block to suit the knife by means of the screw at the side. Width of knife,  $2\frac{1}{2}$  inches.

Price,

per dozen, \$9 00

Packed one dozen in a case.

### The American Cake Mixer.

This machine is intended to beat up to the necessary lightness the batter for cakes, pastry and similar good things, in place of the laborious method of mixing the same by hand.

It mixes all the different ingredients more thoroughly and with less effort, in one-fourth the time and better than can be done by hand. It is also recommended for cleanliness, as by using it there is no necessity for putting the hands in the batter.

The machine is fastened to the edge of the table by clamps. The handle is turned to the right, and the ingredients are put in pan in same order as in mixing by hand. The turning is continued until batter is light enough. The central dasher with the arms turning in one direction, and the scraper in the opposite one, produces a thorough and quick beating of the mixture. The wooden scraper keeps the side of pan perfectly clean.

We recommend this machine, and guarantee it to give satisfaction for all kinds of mixtures where a thorough beating of the ingredients to insure lightness speedily and with little physical effort is an object.

Besides machines for family use, we manufacture large sizes for confectioners, bakers, etc.

No. 6, (Pan holding 6 quarts), . . . \$3.50 each.

Packed one in a box.
